The disclosure is objected to because of the following informalities:

The Brief Description of the Drawings is missing a description of Figure 2.

On page 10, there is a problem with the numbering of the layers. Two different layers are given the same number, and the descriptions of all the layers don't seem to agree with those shown in the figure.

Appropriate correction is required.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The Budinger (4,198,739) and Stephenson (5,225,248) references show multi-layered laminates in which a curing agent migrates from one layer to an adjacent layer, but neither shows or suggests the migration of curing agents from a middle layer to two adjacent layers.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
